

*The old world is dead. Worse, it was a lie.*

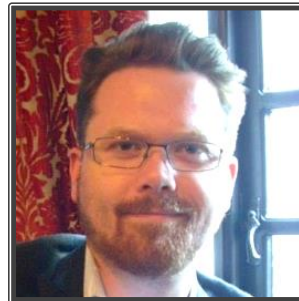

Haskell wants to be a legend, a hero like his grandfather who broke the orcish hordes. Froba just wants to survive. She knows what Haskell doesn't: that the deck is stacked against them, and there are no heroes in the world. After assembling a band of misfits, Haskell must face a labyrinthine dungeon, an exploitative, monster-hunting guild, and his own failings, while Froba must decide where her loyalties lie—with her naïve mark or corrupt master. If traitors and woodland monsters don't murder them first.

A naïve warrior and band of misfits must survive a monster-infested wood, labyrinthine dungeon, and the exploitative guild founded to clear them.

### About the Author

J.D. Mitchell is a Canadian writer of speculative fiction. His stories are informed by his historical studies and transient upbringing. The latter, while terribly angst-inducing, exposed him to a rich tapestry of people and places, as did his varied service industry jobs and a sixteen-year stint in the Public Service of Canada (but who's counting?). He lives in Ottawa, Canada.
